Tab 2

Summary Analyses

This section summarizes the Financial Metrics volume of the Sherlock Benchmarks. It includes a summary of median values, a functional area summary, a longitudinal (year-over-year) comparison, comparisons with other Sherlock Company reports and changes in participant plan cost growth.

The median values for each functional area and product are shown in this section. The summary of medians is intended to provide an immediate and accessible metric of central tendency for administrative costs in each product / expense cell. If your plan has submitted data to this survey, median values are printed in black if the plan has low costs and red if it has high costs.

The functional area summary provides a high level analysis by four high-level clusters of functional areas. Results are presented on a per member per month and percent of revenue basis. All of the expense classifications reported by the respondents have been summarized in this section. Revenues are defined as premiums or self-funded fees. Premiums and fees exclude those of pharmacy and mental health, as do their associated expenses.

Sherlock Benchmark values are provided in a slightly different form in *Plan Management Navigator* and figures in this tab facilitate their comparison.

Tab 3

Functional Expenses, Across Products

This section provides an analysis of specific functional expenses across product lines. Values are presented to account for whether services are provided internally or outsourced. Costs are presented on a per member per month and percent of premiums and/or fees basis. Premiums and fees exclude those attributable to pharmacy and mental health.

Tab 6

Expenses of Specialty Services and Other Self-Contained Activities

This section provides an analysis of specialty and other self-contained net or total expenses across products. These activities are Pharmacy, Mental Health, ICD-10 Information Systems and COB and Subrogation. Values are presented on a per member per month and percent of premiums or premiums equivalent basis.

In calculating ratios, premiums and equivalents exclude pharmacy and mental health, except they are respectively included for pharmacy and mental health functions. Membership refers to all members except in the case of pharmacy, in which only pharmacy members are used if available.

While Pharmacy, Mental Health and ICD-10 Information Systems are excluded from the total expenses found in Tabs 3-5, Healthcare Recoveries contains a more detailed analysis of COB and Subrogation and Provider Recoveries included in those tabs.

Figures	Function	Page
Pharmacy		
6-1 & 6-2	Administration.....	246

6-23 & 6-24	Provider Recoveries.....	268

Tab 7

Supplemental Schedules

- **Costs Charged by Parent Organization** reports the size and scope of costs that are charged to the health plan from its parent organization (e.g. legal services, accounting, etc.). It can also provide a gauge of the reasonableness of such services, though it should be understood that this application is limited since the precise nature of the services for which the parent bills is unknown.
- **Depreciation and Amortization** reports the size and scope of depreciation and amortization expenses. The non-cash expenses of depreciation and amortization are included in the functions that they support in the main schedule of the administrative expense survey form. In this schedule, only depreciation and amortization expenses are included in each functional area.
- **Strategic Project Expenses** reports the size and scope of those expenses that are considered by your plan to be part of strategic projects. Expenses are reported by functional area. "Strategic" here is intentionally vague, as the purpose of this schedule is to allow plans to compare the amount of expenses that they consider strategic with other plans.

In all schedules, revenues are defined as premiums and fees excluding pharmacy and mental health.

Figure	Schedule	Page

7-9	Percent of Total Administrative Expenses.....	285

Tab 8

Finance & Accounting Details

This includes Stop Loss metrics, which relates to Plan working capital as well as product design. Other topics include metrics of financial condition and liquidity, aging of Property, Plant and Equipment, non-cash expenses, capitalization vs. expense of strategic projects and an analysis of taxes stemming from health care reform.

Stop-Loss insurance is often sold to self-insured (ASO/ASC) customers of health plans. Since stop-loss has different economic characteristics than ASO/ASC but they are often sold together, it can be illuminating to look at stop-loss and ASO/ASC products as though they were combined. In this section, we report the proportion of ASO/ASC membership that purchases stop-loss coverage and the costs and revenues of the product on a stand-alone basis. We also report the combined economics of the ASO/ASC plus the stop loss insurance to get a complete view of these complementary products. These analyses are performed with and without prescription drug and mental health benefits, expenses and associated revenues.

This section also includes metrics of financial efficiency, financial strength, capital intensity, amortization policies, strategic projects and ACA taxes and fees.

Information Systems, Allocated by Supported Functional Areas

This section provides an analysis of functional expenses, allocating Information Systems expense to the functional areas that it supports. These allocations are then analyzed to determine the impact on each functional area, how it varies between functional areas and the importance of staffing costs relative to the reallocated expenses.

The first analysis, "Information Systems Allocations," includes all IS expenses such as infrastructure and software. The second analysis is only for applications that can be traced to specific functional areas.

This analysis is based on Comprehensive Total data. Revenues are defined as premiums and self-funded fees. Premiums and fees exclude those of pharmacy and mental health, as do associated expenses. "Loaded" means that the information systems allocations have been added to the reported functional area costs.

Figure	Schedule	Page

Tab 9

Costs of Medicare Offered by Other Universes

This section provides an analysis of Medicare Advantage, Medicare SNP, Medicare Cost, and Medicare Part D plans that are offered by other universes in Sherlock Company's benchmarking study for 2015. Data is presented on a per member per month and a percent of revenue basis.

Revenues are defined as premiums or self-funded fees. Premiums and fees exclude those of pharmacy and mental health, as do associated expenses.
